Intense Pulsed Light (IPL) Consent Form

The Palomar Medilux is an intense pulsed light (IPL) device used for the treatment of benign pigmented and vascular skin lesions. IPL treatments are a series of approximately 4-5 treatments performed at approximately 3-4-week intervals. Actual results vary from patient to patient. The IPL treatment is a cosmetic procedure and insurance is not accepted.

The procedure is contraindicated in the following situations: pregnancy, the use of medications that cause photosensitivity (sensitivity to sunlight/light), the use of anticoagulants (blood thinners), a history of bleeding disorders, sun exposure (tanning) 3 weeks prior to treatment, or planned sun exposure within 1 week after any treatment. Diseases that increase sensitivity to sunlight/light (Lupus/SLE) or very dark skin types also should not undergo IPL treatments.

I understand that there are possible risks to these treatments. These risks include rare side effects such as scarring and permanent skin discoloration as well as short-term effects such as redness, burning, bruising and temporary skin discoloration. These side effects have all been fully explained to me and I accept the risks of the IPL treatment series.

I understand that IPL treatments may affect hair growth. For this reason we do not treat over men’s bearded areas unless expressly discussed in consultation.

To achieve optimal results from the IPL treatment series, we strongly encourage maintenance treatments. Usually this consists of 1 treatment every 4-6 months.

I certify that I have been given the opportunity to ask questions and that I have read and fully understand the contents of this consent form.

Client Signature: ________________________________ Date: __________

Client Name: ____________________________________________
